Introduction

We are going to use ZOOM Webinar for the seminar operation.
This support document provides step-by-step instructions for participants on how to use ZOOM.
Please read this carefully in advance and be prepared.

1. Please make sure of your internet connection environment first.
We recommend using a wired LAN.

〈For those who wish to make a question with microphone〉

1. Find a quiet place as much as possible.
2. Make sure your PC has a speaker and microphone.
3. Use earphones with mic or headset microphones.

Preparation① Install Zoom

If this is first time for you to use zoom, please install zoom in your PC.

Go https://zoom.us/download#client_4meeting

Click “Download”

Zoom will be automatically operated from the next log-in time

Note: You may log-in from your browser, but some functions might be lost.

The screenshot shows the Zoom Download Center interface. At the top, there is a light blue header with the text "Download Center" on the left and "Download for IT Admin" with a dropdown arrow on the right. Below the header, the main content area is white. It features the heading "Zoom Client for Meetings" followed by a paragraph: "The web browser client will download automatically when you start or join your first Zoom meeting, and is also available for manual download here." Below this text is a prominent blue button labeled "Download". To the right of the button, the text "Version 5.6.1 (617) (32-bit)" is displayed. At the bottom left of the content area, there is a link that says "Download 64-bit Zoom client".
